JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

London when the last Earthquake happen'd), that he either had *no Perception* at all concerning himself and the Ground under him; or at least was so intirely engaged in observing what he saw and heard, that he had no Attention to what he felt.

N. B. I made this Memorandum immediately after after conversing with this *Robert Shaw*; and therefore I suppose it contains a tolerably exact Account of what he related to me.

Friday Morning, March 9.
1749.

James Burrow.

XVII.

The Rev. H. Miles D. D. F. R. S. to Mr. H. Baker F. R. S. containing a more full Account of the same than his former Letter, Art. XII.

Read March 15.
1749. **I** NOW send you the best Account I am able of the Earthquake which was so generally felt in the City, and round about it, on the 8th instant in the Morning at 5^h 40' nearly, equal time.

I was then standing in my Study, when I heard a Noise, at the first Moment, very like the Explosion I heard several Years ago, when some drying and Storehouses of Gunpowder were blown up about 6 Miles from us: This Noise issued in a Murmur in the Air, like distant Thunder, and ended like a rushing Wind: There was no perceivable Interruption

in the Noise from first to last; it seemed to come from the West, and continued about 4" exclusive of the Tremor, which lasted some time after the Noise seemed to have ceased. I found no Motion of the Floor, which is over a Cellar, upon a Level with other adjoining Ground-floors; but the Doors of my Book-Presses, at the West End of the Room, shook to and again, and the Rings on the Doors rattled exceedingly; but I was not sensible of any Motion of the other Doors on the Sides of the Room, near to some of which I then stood.—Such of the Family as were in Bed felt their Beds to be raised up, and then shook from Side to Side.

A sensible young Gentleman, who call'd upon me that Morning as he came from *London*, told me, that, considering the Situation his Bed was placed in, and the Motion he felt from one Side to another, he concluded the Shock proceeded from the West. The same Observation, he said, others had made, with whom he had talked.

It was universally felt here, and very much at the following Places around us: At *Merton*, about a Mile S. W. from us, and at *Mitcham*, about 2 Miles S. at *Croydon*, 4 Miles S. some Tiles fell from Houses; it greatly alarmed the Inhabitants of *Streatham*, about a Mile and a half East of us; at *Clapham*, two Miles and a half N. a Chimney, and other Parts of a Building fell down; at *Wandsworth*, two Miles N. W. the Shock was very great; especially near the Side of the *Thames*. It was felt likewise at *Epsom*, about nine Miles S. W. from us; but how much farther, my Information does not say.

Upon

Upon Inquiry made of several Persons, who were abroad at the time, going to their Work, I cannot hear of any one, who saw any Lightning, perceiv'd any Noise, or felt any thing of an Earthquake.

The States of the Barometer and Thermometer were not remarkably different from what they had been for several preceding Days; however I have added them underneath, and am

Teoting, March 14. Your, and the Royal Society's
1749.

most obedient Servant,

H. Miles.

7 Day at 4^a a. m. Bar. 30,07. Therm. 32 almost,
W. W. clear, and white Frost.

D^e at 9^b p. m. Bar. 29,99. Therm. 40, clear Evening.

8 Day at 4^a a. m. Bar. 30,07. Therm. 40, cloudy Morning. W. W.

D^e at 2^a p. m. Bar. 30,14. Therm. 58, cloudy Evening. W. W.

XVIII.

John Martyn M. D. F. R. S. &c. to the
President, concerning the same.

S I R,

Chelfea, March 14. 1749.

Read March 15. 1749. **I** ONCE more trouble you with the
Mention of an Earthquake, which
was felt here on *Thursday* the 8th instant, at about
5 half
